DECKING & CLADDING STABILIZED TO LAST

Decking is the toughest job you could ask a wooden board to do. Between foot traffic, harsh weather, and the changing seasons and moisture levels, you must start with the right species, but why stop there?

Enhance the natural beauty of the wood and protect your investment for years to come with Horizons. We've added a stabilizing finish with a touch of pigment which prevents end checking and warping along with premature weathering. The added pigment heightens the saturation of the natural colors and with proper maintenance, helps to protect that beauty for the long term.

While primarily a decking line, Horizons products are perfect for cladding, too, as well as many other exterior applications. Let's discuss how Horizons will best fit into your next project. Reach out to request a quote or sample via our website!
